Thanks; hope you had a good trip. Don't expect you to have any update on AWG; we will provide that if you can discuss you data. Thanks.

Sorry I missed your message last week ... I was at WQTC in Portland. I'd be happy to present the condensate data (what I have so far) next week. Still have myco culture plates in the incubator ☺ I don't know what to say about the WaterGen project however, as I haven't heard an update but it sounds like it's moving forward (?).

This is the meeting I mentioned in my voice mail. I'll be in RTP the rest of the week, so easiest to communicate via email. Hope you can make it.
